PROJECTS

E-commerce Store (02/2023 - 06/2023)

- React.js:** Used as the front-end JavaScript library to create dynamic and interactive user interfaces, enabling seamless navigation and real-time updates.
- Node.js:** Employed as the server-side JavaScript runtime environment, facilitating server-side functionalities for the E-commerce store.
- Express.js:** A web application framework used with Node.js to handle server-side routing, middleware, and other backend functionalities.
- MongoDB:** Serves as the NoSQL database, storing and managing product data, user information, and other relevant E-commerce store data efficiently and flexibly.

Bus Management System (10/2022 - 12/2022)

- HTML,CSS,ASP.Net,SQL

Calculator (11/2022 - 12/2022)

- An innovative and user-friendly calculator built with **React.js**, offering a seamless and interactive experience for performing a wide range of mathematical operations with ease and precision.

Saloon Management System (09/2022 - 10/2022)

- Revamp the salon experience with our cutting-edge Saloon Management System developed in **React.js**, providing seamless appointment booking, inventory management, and customer engagement features to empower salon owners and elevate customer satisfaction.

LinkedIn clone (03/2022 - 05/2022)

- Innovatively crafted a dynamic LinkedIn Clone using the **MERN (MongoDB, Express.js, React.js, Node.js)** technology stack, empowering users with seamless networking, profile management, and Authentication, while honing expertise in full-stack web development.

Library Management System

- Developed a comprehensive Library Management System in **C++**, highlighting proficiency in programming fundamentals and C++ language features, enabling effective resource management, book tracking, and user engagement for streamlined library operations.
